

REFERENCE

NASCO LAKE COMO

MINIMUM RECYCLING CONTENT

47%

The composition for the reference NASCO LAKE COMO includes a percentage of recycled material content, including water and mineral recycled raw materials of 47%. The time period considered for this calculation ranges from 01/05/2023 to 30/10/2023.

- a) Waste water content recycled from pre-consumption of internal and external origin.
- b) Solid material content recycled from pre-consumption of internal and external origin.

Total water content (kg)	538
Total solid content (kg)	1.010
New water content (kg)	0
Recycled waste water content (kg)	538
Solid raw materials content (kg)	813
Solid material content recycled from pre-consumption (kg)	197
RECYCLING CONTENT (%)	47%

REDUCED USE OF RESOURCES

20%

Materials reduction

100%

Water reduction

87%

Energy reduction

Reduction of material resources (%)	20%
Reduction of water resources (%)	100%
Reduction of energy resources (%)	87%

The content of this Product Environmental Self Declaration and the automatic calculation methodology meet the requirements established in the UNE-EN ISO 14021 standard and has been verified by the Institute of Ceramic Technology on Rev.1.
